Yvonne,

In reviewing the redline version of the RFI/RI Volume 2 Addendum, DTSC is in general agreement with the document with exceptions at noted areas. DTSC noticed that the redline version had proposed specific changes without prior discussions with agencies. Specific directions on the changes necessary to the redline version is provided in the attachment. Please note that since the redline was submitted in pdf, all comments and directions are provided using pdf editing tools.

Although DTSC is providing approval of this document on condition that PG&E incorporates all changes as directed, DTSC requests that PG&E revise the redline addendum and resubmit the document in MS Word for revision check. Furthermore, PG&E should produce the final document with certification that no additional changes were made since this set of comments.

If you have any questions, please feel free to contact me.
