

PUBLIC NOTICE

Completion of First Five-Year Review on Groundwater Remedy PG&E Topock Compressor Station Remediation Project San Bernardino County, California

Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the U.S. Department of the Interior (DOI), in cooperation with the California Department of Toxic Substances Control (DTSC), has completed a Five-Year Review process that reviewed the groundwater remedy implemented at the Topock Compressor Station in San Bernardino County, California. The selected remedy for groundwater includes the use of in-situ treatment with fresh water flushing for groundwater contamination associated with Solid Waste Management Unit (SWMU) 1/Area of Concern (AOC) 1 and AOC 10.

The purpose of the Five-Year Review is to ensure that the implemented remedy functions as intended and is protective of human health and the environment. Five-Year Reviews will continue for the life of the site until hazardous substances, pollutants, or contaminants no longer remain on site at levels that do not allow for unlimited use and unrestricted exposure.

The Final Five-Year Review Report is available at the following information repositories:
