Subject: SUBMITTAL: Revised Implementation Plan for Packer Evaluation of the MW-64BR Borehole

Hello Karen, Aaron, and Pam,

On behalf of PG&E, this email submits the Technical Memorandum entitled Revised Implementation Plan for Packer Evaluation of the MW-64BR Borehole. This implementation plan was initially submitted to the agencies November 11, 2010, and has been revised in accordance with DTSC comments transmitted to PG&E on December 3, 2010. As discussed with the agencies in recent conference calls, PG&E is planning to install the packer system in the MW-64BR borehole during the week of December 20, 2010.

Regards,

Mike Cavaliere, P.G.
