Subject: Request to submit final design cost estimate 12/4/2015

Aaron and Pam –

Per your direction letter of October 19, PG&E will submit our final groundwater design no later than November 18, 2015. The final design changes must be reflected in the design cost estimate, and as a result the cost estimating would normally lag behind completion of the design itself. Because of this, we are requesting your approval to submit the cost estimate appendix on or before December 4, 2015 (approximately 2 weeks later).

We appreciate your consideration of this request,

Yvonne Meeks
