Subject: Waste Management Plan Addendum  
Waste Discharge Requirements, Order No. R7-2006-0060  
Pacific Gas and Electric Company, Topock Compressor Station, IM-3 Facility  
Needles, California

Dear Mr. Perdue:

Pacific Gas and Electric Company (PG&E) originally submitted the Waste Management Plan for the Topock Compressor Station, Interim Measures No. 3 (IM-3), to the Colorado River Basin Regional Water Quality Control Board (Regional Water Board) on March 24, 2005. The Waste Management Plan addresses Condition V.C.2 of Waste Discharge Requirements Order No. R7-2006-0060 (successor to Order No. R7-2004-0103).

This letter serves as an addendum to the Waste Management Plan. This addendum notifies the Regional Water Board that PG&E intends to use other licensed transporters and permitted treatment and disposal facilities, in addition to those already identified in the Waste Management Plan for the management of IM-3 wastes. As discussed with Regional Water Board staff on October 26, 2006, the submittal of this letter constitutes compliance with Condition V.C.2 of Order R7-2006-0060.

Please contact Curt Russell, PG&E Topock Onsite Project Manager, at (760) 326-5582 if you have any questions regarding this addendum.

Sincerely,

Curt Russell  
Topock Onsite Project Manager
