**Subject:** Re: Topock Proposed Protective Measures for Roosting Bats [EXTERNAL]

**Follow Up Flag:** Flag for follow up  
**Flag Status:** Flagged

The Department of the Interior and US Fish and Wildlife Service have evaluated the proposed protective measures for roosting bats that will be applied during the groundwater remedy construction. Additionally, the document was provided to the Arizona Game and Fish Department for their input as well. The agencies believe that the approach is reasonable for protection for of roosting bats during the remedy construction and have no further comments.

Thank you.

Hello,

Please find attached the Proposed Protective Measures for Roosting Bats for the Topock GW remediation project. These measures were written by Dr Dave Johnston and are based on survey results for roosting bats from last summer and this spring. Please don't hesitate to contact me with any questions.

Cheers,

Virginia
