Subject: Topock Soil RFI/RI - Work Plan for Ambient/Background Study of Dioxins and Furans at the Pacific Gas and Electric Company Topock Compressor Station, Needles, California, December 20, 2016, for the Pacific Gas and Electric Company, Topock Compressor Station, Needles, California

Dear Mr. Russell

The United States Department of the Interior (DOI), on behalf of the Bureau of Land Management (BLM), the U.S. Fish and Wildlife Service, and the Bureau of Reclamation (collectively referred to as "DOI"), has completed the review of the *Revised Work Plan for Ambient/Background Study of Dioxins and Furans at the Pacific Gas and Electric Company Topock Compressor Station, Needles, California* dated March 2, 2017. The work plan has been revised per the February 28, 2017 DOI directives letter.

DOI understands that the timely implementation of this work plan is critical in order to verify that the data gap evaluation is complete and maintain the schedule to complete the risk assessment for the purpose of making decisions on displaced soils from the groundwater remedy construction. DOI appreciates the collaboration between all the parties involved in the project towards accomplishing this objective.

As per the directives letter, Pacific Gas and Electric Company shall provide a two-week notification of field work to collect samples outlined in the work plan to allow participation by tribal representative in locating the D/F samples in the drainages.

If you have any questions, please contact me at (602) 417-9578.

Sincerely,

A handwritten signature in black ink that reads "Pamela S. Innis". The signature is written in a cursive style with a large initial 'P' and a distinct 'S'.

Pamela S. Innis
