**Subject: Topock IM-3 Third Quarter 2023 ARARs Letter  
PG&E Topock Compressor Station, Needles, California  
Interim Measure No. 3 Groundwater Treatment System**

Dear Ms. Dickerson and Mr. Stormo:

On March 22, 2022, IM-3 entered the layup mode per the approved IM-3 Decommissioning Work Plan. Pursuant to the IM-3 Decommissioning Work Plan (Section 2.3), quarterly letters are required on January 15, April 15, July 15, and October 15 stating no operation and no discharge occurred during the previous quarter, until DTSC directs PG&E that it is no longer required to operate IM-3, at which point PG&E's compliance obligations with the IM-3 ARARs are complete.

During the Third Quarter 2023 (July 1 to September 30, 2023), IM-3 continued to be in layup mode with no operation and no discharge to the injection wells. The groundwater monitoring results for wells OW-1S/M/D, OW-2S/M/D, OW-5S/M/D, CW-1M/D, CW-2M/D, CW-3M/D, and CW-4M/D will be submitted under separate cover, as part of the Remedy Monitoring Program.

If you have any questions regarding this information, please call me at (760) 903-3013 or Christina Hong at (626) 297-5292.

Sincerely,

David Diaz  
Topock Site Operations Manager
