

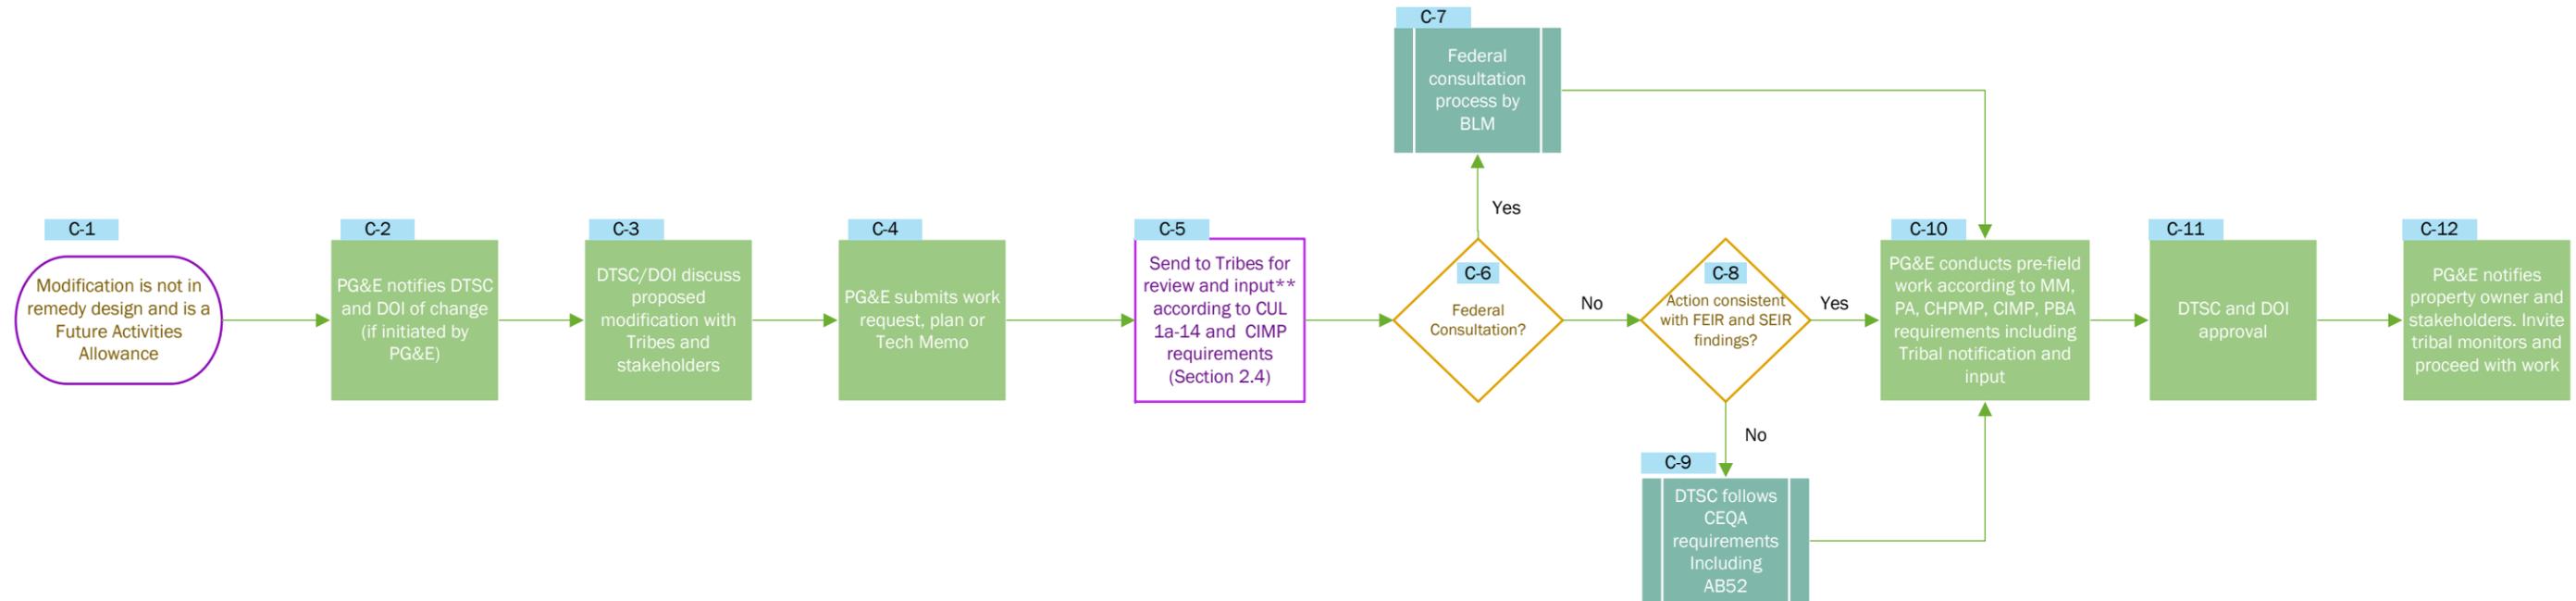

Exhibit 3 to the Statement of Decision and
Resolution of Approval

Communication Protocol for Future
Activity Allowance

Communication Protocol for Future Activity Allowance¹

During construction, operation, and maintenance

¹ Future Activity Allowance is an activity that is not considered in the remedy design but necessary to support the project objectives. Future Activity Allowance is a Material Deviation which is defined in the final groundwater remedy design as:

Material Deviation means a change or correct from a condition that would (1) render the approved design non-compliant with codes, regulations, and /or engineering standard of practices, (2) render planned well locations and/or constructions fail to meet the project objectives, (3) cause significant schedule delay, and/or (4) cause a significant increase in costs. (CH2M Hill, 2015)

** All Tribal input received in writing as part of communication for material deviations discussions, including Future Activity Allowance, will be kept as administrative record for project.

Acronyms:

- BLM – Bureau of Land Management
- CIMP – Cultural Impact Mitigation Program
- CHPMP - Cultural and Historic Property Management Plan
- DOI – United States Department of the Interior
- DTSC – Department of Toxic Substances Control
- FEIR – 2011 Final Environmental Impact Report
- MM – Mitigation Measures
- PA – Programmatic Agreement
- PBA – Programmatic Biological Assessment
- SEIR – Subsequent Environmental Impact Report
